RuffneckTM
Heaters for the Harshesht Environments
CaloritechTM
Engineered Electric Heat

Buy any instock *Ruffneck*TM or *Caloritech*TM heater before December 30, 2019 and receive **SPECIAL PRICING***

Brews Supply is proud to represent Thermon Heating System brands: *Ruffneck*TM and *Caloritech*TM Heaters.

Ask your Brews sales representative if you require additional information on any Thermon Heating Systems products

*While quantities last. Valid in the Edmonton service area.

Get ready for winter with Brews Supply and Thermon Heating Systems

Brews Supply stocks a full line of Thermon accessories including explosion-proof thermostats for *Ruffneck*TM heaters and heavy duty and waterproof thermostats for *Caloritech*TM industrial heaters.

Thermon Heating Systems is a world leader in the development and production of advanced heating solutions for industrial and hazardous area applications.

The *Ruffneck*TM and *Caloritech*TM line have enhanced Thermon Heating Systems position as one of North America's leading manufacturers of industrial heating equipment.

*Ruffneck*TM from Thermon Heating Systems is renowned for its rugged, reliable and versatile heavy-duty explosion-proof heaters, heating systems and heating accessories.

*Caloritech*TM by Thermon Heating Systems features the broadest array of industry-standard heating products for industrial process heating with the most available options on the market.

FEATURED PRODUCT

BREWSALES@BREWSUPPLY.COM

Ruffneck™

FX5 - Explosion-Proof Electric Air Unit Heater is designed for the harshest industrial environments and intended for dry indoor industrial applications such as oil refineries, petrochemical plants, pulp and paper mills, grain elevators, hazardous waste storage facilities, wastewater treatment plants. This heater is ideal anywhere that specific explosive gases or dusts may be present.

FEATURES

- Certified for use in hazardous location areas
- Numerous factory installed options available
- Dual temperature high-limits for overheat protection
- Designed for the harshest industrial hazardous location environments

Suitable for the following hazardous location classifications:

- Class I, Divisions 1 & 2, Groups C & D
- Class II, Division 1, Groups E, F & G
- Class II, Division 2, Groups F & G
- Class I, Zones 1 & 2, Groups IIA & IIB
- Temperature Code T3B 329°F (165°C)

Caloritech™

PH - Fan-Forced Enclosure Heater are designed to control the environment within enclosures by maintaining a stable temperature. The effects of low temperatures, such as corrosion, freezing or condensation, will adversely affect the components inside control panels. The Enclosure Heater provides an optimal performance environment for the critical components contained within the control panel.

Strip Heaters (FS, SD, SS Series) are a versatile and economical heating source typically used across a wide range of applications, including surface heating (platens, dies, molds, tanks, piping); process air heating (drying cabinets, ovens, baking ovens, vacuum dehydrating ovens, moisture protection for motors); dropping resistors for line applications in railroads and load banks; winterizing (hoppers, conveyors, ducts, car heating, thawing); original equipment (air conditioning, laboratory equipment, food packaging, ovens, presses, drying equipment).
